

# Your hygiene plan for Giardia

Your vet takes care of your pet. With this checklist you clean the surfaces your pet touches, every day. Put it up in your kitchen and tick off what is done.

## Before you start

Pick up faeces straight away, indoors and outdoors, and put them sealed in the household waste. Use a bag or disposable gloves.

## Every day, in this order

### 1 Bowls, beds, carrier

Remove dirt, then spray with the hygiene spray until the surface is visibly wet. Wait for the contact time on the label, then wipe or let dry. Rinse bowls with clean water before the next meal.

### 2 Blankets and covers

Wash as the care label says, as hot as the fabric allows, separately from the rest of your laundry.

### 3 Floors where your pet lies

As the label says, 100 ml floor concentrate to 5 l of lukewarm water. For tiles, laminate, vinyl and sealed wood. Mop wood with a barely damp mop only. Keep your pet off the floor until it is dry.

### 4 Wash your hands

After every round and after every contact with faeces.

## How long?

Until your vet gives the all-clear. The cleaning does not stop on the first better day.

**Use biocides safely. Always read the label and product information before use.**

ViPiBaX Giardien EX is for hygiene around your pet, not for the pet itself, and does not replace veterinary treatment.
